

## Young Lady Killed By Electric Wire

### Young Woman in Strathcona Grasped an Incandescent Wire and Was Almost Instantly Killed

Grasping an apparently harmless incandescent light wire and with the still flaming bulb under the folds of her dress Apollonia Smyth, a fourteen year old German girl was found at six o'clock last night unconscious in the cellar of the home of Thomas Bennett, Immigration Agent, Strathcona, where she was engaged as a domestic. A few moments later she expired.

The unfortunate girl had gone down the steps of the cellar, with a plate and a knife in hand to get some butter and while moving the wire which hung on a nail near the stairs she touched an uninsulated part with fatal results.

Mrs. Bennett was sitting in the parlor at the time and was horrified to hear an explosion, a spluttering of the electricity and a heavy fall to the floor. She hastened to the head of the stairs and looking down, saw the girl lying prostrate on her face at the foot of the steps. Though greatly agitated by the sight she managed to pull the wire from the charred and blackened hand of the girl and then hastened to the next door neighbor and secured his assistance. Between them they carried the victim of the fatality to the top of the stairs, but before Dr. Archibald who had also been sent for arrived the girl was apparently dead. The doctor administered a hypodermic but medical aid was unavailing.

Dr. Holton, the coroner, was also summoned and after viewing the body decided to hold an inquest this afternoon. The remains were removed to Waugh's undertaking rooms, room, where they now lie.

The poor girl who was so suddenly killed had only come to the home of Mr. Bennett the previous evening from

### NEW COMERS DOING WELL.

Mr. Edward O'Kell's Canadian Government agent at Belfast, Ireland, who visited Edmonton last week, was driven to several points in the district by Mr. T. Irvine, and found many people whom he had been instrumental in sending to Alberta from the county of Ulster. They were found uniformly prosperous and contented. A trip was made to the Port where several former Belfast people reside, and at Horse Hills Mr. O'Kell found Mr. F. Lockhart, a former Ulster man, who has been very successful. Coming to Alberta seven years ago he purchased a farm on Mr. Walter's hill, several miles down the river from the city for \$5 per acre. Some time since he sold this for \$5 per acre and removed to Horse Hills, where he secured another farm near school accommodation for \$18 per acre. The home of Mr. John Kennedy was also visited. Mr. Kennedy visited Ireland and a couple of years ago in connection with the work of the immigration department and to him Mr. O'Kell gives a large share of credit for the fact that this season he booked 5018 people from Ulster to Canada, many of them coming to Alberta. A large number of former Ulster people are residents of Strathcona, and many more settlers near Ponoka. They were found in nearly every case satisfied and doing well. Among them is J. Dovan, of Strathcona, who is reported to have recently purchased Cushing Bros' yard. Mr. O'Kell is pleased to find the satisfaction and prosperity of the people he had been instrumental in sending out and believes their success will encourage many more to follow their example.

### MARAUDERS AT HAVANA.

Havana, Nov. 4.—On account of the great insecurity left from the presence of bands of robbers and free booters all over the island, Governor Magoon has organized bands of rural guards which will be sent out to harass these. American troops will replace the rural guards in the cities and towns.

her home at Stony Creek where her parents live.

Electrocution from an incandescent light wire is very unusual unless there are connections with a wire carrying a heavier current elsewhere. Examination was made by the city electrician, but he could discover no evidence of anything of this kind. The girl, however, had been in a suitable condition to receive the full effect of the current, as her hands and feet were both damp and the shock of 105 or 110 volts would therefore have a much greater effect.

## City Council

### HELD REGULAR SESSION.

Street Car Petition Filed Away—Paving Company Wants to Establish Plant Here—Traffic Arrangements for Clover Bar Bridge.

At the city council meeting last night there were present Acting Mayor Picard and Ald. Smith, Manson, Mays, Bellamy and Griesbach.

A telegram was read from F. W. Morse stating that the detailed plans for the Clover Bar bridge were now being prepared and that if the city desired traffic attachments now was the time to act.

Ald. Griesbach asked what had happened to the petitions which were being circulated among the Clover Bar farmers asking the Dominion government to make an appropriation on this account.

Commissioner Pace stated that so far only one of the petitions had come in.

The commissioners were instructed to wire Mr. Morse that the city was taking action.

John Walters wrote stating that his mill was so far along that he wanted a couple of fire hydrants and a couple of arc lights. The council instructed that the water and light service be extended to the Walters mill site.

The Warren Bituminous Paving company, of Toronto, wrote stating that they proposed to establish a western headquarters and asked if Edmonton was prepared to offer any inducement to their company to locate a plant for the manufacture of bituminous paving blocks in this city; also they inquired if Edmonton was prepared to undertake any permanent paving next year.

On motion of Ald. Griesbach the commissioners were instructed to reply to the writers informing them that the city would be prepared to negotiate with them on a basis of reduced rates for water light and power.

The street car petition asking that the route of the street railway be laid down as far east as Kinistino, instead of on Nanawap, was read.

Acting Mayor Picard stated that the street railway, when built, would be for use and not to look at and that the street railway would be built where the railway would pay. He believed that the whole proposition was still in the embryonic stage and that the petitioners would have their opportunity to present their case in due time.

Ald. Mays said that it had not been decided yet to build a street railway and that when it was decided, he was of the opinion that it should go farther east even than Kinistino. He moved that the petition be laid on the table.—Carried.

The report of the committee to investigate the charges of the contractors against the city engineer's department was read and adopted.

In regard to the Taylor and Darroch claim for damages to a team buried in the nuisance ground, which was referred back to the commissioners to get a valuation of the damage to the team, the commissioners reported that the valuation, according to J. H. Pickering, V.S., was excessive. Taylor & Darroch placed it at \$175. Mr. Pickering placed it at \$100. The commissioners had previously reported that in their estimation the city was not liable for damages as the damage was due to negligence of the driver. The report was adopted.

The commissioners reported that they had had a speedway laid out in the east end park which would be a part of the permanent plan. Two tenders for grading the speedway were submitted, the lowest being \$400, which was accepted by the council, and the work will go on at once.

Ald. Mays brought up the question again of the option which the city holds on the exhibition grounds. Last spring, when the exhibition preparations

## Charge Changed

### TO THAT OF THEFT.

McGill Now Charged with Stealing Large Sum from Ontario Bank.

Bulletin Special.

Toronto, Nov. 7.—There was a sudden change in the aspect of the Ontario Bank investigation this afternoon and at the present time Charles McGill lies in the Central prison with the charge of theft registered against his name instead of the former one of preparing false returns. Walter R. Chapworth, who prepared the returns under the direction of McGill, was on the stand all the afternoon and explained some of the transactions whereby the bank was relieved of funds, and the part which McGill took in them. After listening to some of the evidence Magistrate Dennison formally charged the prisoner with stealing \$138,094.91, the property of the Ontario bank. Bail was refused and the prisoner was sent to jail at the adjournment of the sitting.

## Train Held Up

### BY THREE ARMED MEN.

Robbers Hold Up Passengers While Train Stands at a Station.

Bulletin Special.

Gallup, N.D., Nov. 6.—While west-bound Santa Fe passenger train No. 1 was standing on the tracks here early today three men armed with revolvers entered the coaches and forced the passengers to hold up their hands. They secured several hundred dollars in money and several grips and made their escape.

## Miners on Strike

### AT NOVA SCOTIA COLLIERY.

Drummond Mine, of the Intercolonial Coal Co., Tied Up.

Halifax, Nov. 6.—Eight hundred miners in the employ of the Intercolonial Coal company at their Drummond mine, Westville, went on strike this morning. Only one pump is running. Trouble arose over the employment of non-union miners. Manager Floyd refused permission for the Provincial Workmen's Association to make a canvass and to try and enroll those who were not members of the association, accordingly they went out. The present difference is trifling but unless concessions are granted trouble may result. It is expected that the solicitors of the Dominion Iron and Steel company, will enter suit against the Dominion Coal company for breach of contract. Work is still progressing in every department of the steel plant with the exception of the blast furnaces and coke ovens. Only two hundred are laid off. Sufficient raw material is on hand for a considerable time.

### TREASURER GONE.

Chicago, Nov. 3.—J. Christian Ekilson, supreme treasurer of the Danish Brotherhood of America, is missing and it is found that \$50,000 of the order's funds are gone too. He has not been seen since Oct. 20th. It is said that practically all of the reserve fund is gone, \$7,000 of which is said to have been lost in the failure of the Milwaukee Avenue bank. Mrs. Ekilson says she will pay the whole shortage.

## City Assumes

### THE TRUNK SEWER CONTRACT.

Investigating Committee Recommends That Contractors be Released and Terms of Settlement Arranged.

The outcome of the differences between the Taylor Construction Co., contractors for the sewer system now being built by the city, and the city engineer's department, is that the city will take over the sewer construction, release the Taylor company from their contract and settle with them by mutual agreement between the contractors, their solicitors, the city commissioners, city engineer and city solicitor, the first session of which settlement convention is to take place today and the ratification of the deal, if a satisfactory settlement can be arrived at, to be put through at an adjourned meeting of the council on Friday evening.

This is the practical effect of the report and the resolutions following, which were adopted by the council last night.

The report found, in effect, that the work was not proceeding owing to friction between the contractors and the engineer, and the committee recommended that the contractors be released and the city take over the work.

Commissioner Pace pointed out that it was important that the arrangements should be made at once so that there would be no delay in the work as to stop where they were would probably entail considerable loss.

Mr. Hyndman, solicitor for the contractors, said they were ready to meet the commissioners at any time and he felt safe in undertaking that the work would be proceeded with until the city was ready to take it over so that there would be no loss from caves or otherwise.

Work out at the big sewer is at a standstill today, however, owing to the stormy weather.

### COMMISSION AT PORTAGE.

For as long as the Portage commission opened its sitting here today, and considerable interest is being taken in the meetings by local farmers. The attention of the commission was taken up by a report from D. W. McQuay, on behalf of the Portage branch of the Manitoba Grain Growers' Association, who submitted a number of resolutions prepared at the meeting of the association some time ago. The resolutions were as follows:

"That there should be remuneration for all screenings composed of oats, or barley, taken from train either at Port Arthur or Port William.

"That weigh scales be so placed in elevators as to be in plain view of the party delivering the grain while the operation of weighing is in progress.

"That whatever quality makes it eligible for any particular grade, the car should be so graded regardless altogether of dockage.

"That all wheat subject to dockage should be cleared before being binped in the terminal elevators."

These resolutions were thoroughly discussed. Mr. McQuay then gave evidence that he had been unable to secure remuneration for seventy bushels cleaned from a car of wheat. He also gave testimony on behalf of Malcolm Currie, who had been unable to secure anything from a car from which 143 bushels of barley had been cleaned.

### Motion Laid Over

#### FOR ENLARGING COUNCIL.

Question Will Come up at a Later Meeting.

Ald. Griesbach brought up his bylaw for enlarging the council last night, and asked for a second reading.

Ald. Bellamy filed an objection at once, stating that they had wasted a lot of time with eight aldermen. He did not see where it is advisable to use more time with ten. The council had had difficulty to get a quorum of eight aldermen.

Ald. Smith—If Ald. Griesbach can show how it will be beneficial I will be prepared to support the bylaw.

Ald. Griesbach pointed out that they had eight aldermen when the city was chartered with 3,000 people, and in the natural course of events, with the population now grown to 13,000 a larger council should be in order.

There was in the city quite an insistent demand for the ward system and it was with a view to heading off the ward system and at the same time to give the people of the city whatever advantages there were in the ward system, namely, giving the people a chance to vote for an alderman from their particular part of the city. He believed that if 12 members were to be elected for the council, that this object would be attained, but as he had found that a bylaw for twelve would not pass and at the same time he thought a bylaw for ten would be going to move for a ten member council. Furthermore, he thought that the business of the council could be expedited by the retirement of committees while the council was in session.

Ald. Manson coincided with the arguments. He was of the opinion that there was altogether too much time required to carry on the city's business and he thought, as Ald. Griesbach, that a larger council would lighten the load on the individual members.

## Hughes Defeated Hearst as Governor of New York State.

New York, Nov. 6.—Congressional returns show that the present Republican majority of 112 in the House of Representatives has been largely reduced. Although the Republicans will keep control of the house by from 40 to 60 majority, the Democrats gained four representatives in Illinois, two in New York, and made inroads on almost every strong Republican delegation.

HUGHES WON IN NEW YORK.

Perhaps the widest general interest centered in the remarkable fight for governor in New York state between Charles E. Hughes, the Republican candidate and William Randolph Hearst, the regular Democratic and Independent League candidate. The latest returns available show that Mr. Hughes, while losing nearly all of the principal cities of the state, was successful by about 50,000 plurality. The rural districts brought about the Republican victory. In New York city the Tammany hall Independent league judiciary ticket was successful, with possibly one exception, over the candidates named by the non-partisan "judiciary nominees."

The southern states that held general election are conservatively Democratic.

In Pennsylvania the early returns showed a lead for Stuart, the regular Republican candidate for governor. Later returns show that Emery, the Fusion candidate for governor, is running ahead of Stuart in some of the up state counties. The fight in Pennsylvania was so bitter that it seemed probable at 12 o'clock that the Republicans would lose several representatives in congress. Later returns, however, show that Pennsylvania has elected Stuart, Republican, for governor, over Cushing, by the usual Republican plurality.

Massachusetts has re-elected Curtis Guild, jr., Republican, as governor, over District Attorney Moran, of Boston, who was the candidate of the Democratic party, the Independence

## Reliable Responsible

# OUR SALE COLUMN.

### Main Street Property

\$2,500 Buys one of the finest corners on Queens avenue, with sixty feet frontage, and a good eight-roomed cottage on the property. This property is situated near the city market and is one of the best sites for a large boarding house. Good terms.

\$14,000 For 25 feet just opposite the old post office. This is splendid property and brings in a good rental; this is one of our snags.

### Warehouse Property

\$6,000 For corner position two lots on Peace avenue. This is one of the best warehouse sites in the city. Get after this at once, as it will sell quickly. Easy terms.

\$16,000 corner position on Mackenzie and Fourth street, with one hundred and fifty feet on Mackenzie.

\$7,500, choice location on Third street between Peace and McKenna.

### Residence Properties

\$14,000 Buys two of the finest view lots on the west side of Twelfth street, together with magnificent brick residence, up-to-date in every way, with water, heating, maple flooring, ceiling, etc. This is a beautiful spot. Very easy terms.

\$12,500 Buys one of the finest residences on Sixth street, south of Jasper, with 75-foot frontage on Fifth street. This house is beautifully finished and up-to-date in every way. Here is a property with the ground around it necessary to show off a beautiful home.

\$18,000 Buys two lots and real little house situated in good locality on Sutherland street, suitable terms.

### Vacant Lots

\$1,500 each, for Lots 2, 4, Block 11, H. B. R. These two lots are situated just on top of the bank commanding one of the finest views in the city facing the Parliament Buildings. This is our special snag—this week. Terms.

\$1000 each for two lots on Elizabeth street; big snag; easy terms.

\$1500 Buys two dandy lots, corner position on Syndicate avenue, close in. Very easy terms.

\$710 Buys dandy lot on Boyle street. This is a big snag.

### Business Propositions

\$3000 Will handle a splendid livery business in complete running order; everything in good shape. Come in and see us re this.

\$2500 For splendid grocery and crockery business, located on Main street in good locality, doing big business.

\$2500 Is the sacrifice price of complete stock and furnishings for one of the best and most up-to-date restaurants, situated in the heart of the city. Here is a chance for some one who is looking for a good opportunity to get into a paying business. Come and see us about this.

### Farm Property

\$1050 Buys a quarter section of prairie land, situated only three miles from railway station. Good terms.

\$18.00 Per acre buys a half section with 115 acres in cultivation, situated eight miles from railway, all fenced, good buildings, and on the banks of the Sturgeon river. Very easy terms.

\$11.00 Per acre for a quarter section of land with fifty acres broken and the rest all ready for the plow, not a foot of waste land on the whole quarter, and situated only three miles from the Canadian Railway station. Here is another snag. Very easy terms.

\$2.00 per acre and upwards, to \$10.00 per acre is the extremely low price at which we can sell you lands almost all ready for the plow, and within five miles of the railway station. If you want cheap farming lands, come and see our list.

EDMONTON WARDROBE.—J. H. MORRIS &amp; CO.

### Motion Laid Over.

(Continued from page 1.)

Ald. Picard spoke from the chair against the motion. He said if ten aldermen gathered around the board it would be a continual talk. He said the new aldermen were the worst talkers and ten of them could waste a lot of time. If ten aldermen were to be chosen the ballot would be several feet long and the chances were that the best men would not be elected. If the city wanted the ward system it was up to the citizens to petition for it. The charter provided for all that and they could have the ward system any time they voted for it.

Ald. Bellamy pointed out that if Ald. Griesbach's proposition was maintained the city, when it reached 75,000, would have 50 aldermen.

Ald. Smith took the same line as Acting Mayor Picard, stating that when a new councillor gets into the council if he thinks at all he wants to talk, all of which takes time.

Ald. Griesbach pointed out that the council had been talking now for half an hour and had been out of order all the time.

Ald. Manson said that if the new aldermen did any thinking they wanted them to talk. It was the aldermen who talked without thinking that they had caused for.

Ald. Griesbach moved and Ald. Mans seconded the second reading of the by-law to make the council one of ten aldermen.

Ald. Smith moved and Ald. Bellamy seconded in amendment that the consideration of the bylaw be laid over for a later meeting.

Acting Mayor Picard voted for the amendment, making it a tie, and then voted as chairman, declaring the amendment carried. He said in so doing that he did not think it fair that such a motion should be passed without a full council.

Ald. Griesbach replied that the notice of motion was on file for two weeks and if the aldermen were not present it was their own fault.

The bylaw will undoubtedly come up again at the next regular meeting.

### Republicans Win With Decreased Majority.

(Continued from page 1.)

League and the Prohibitionists.

In Chicago it is estimated that the Independent League ticket polled 40,000, but there was a Republican plurality for the state officers.

If the Democrats can get the balance of power in the Rhode Island legislature, which is not yet determined by the returns, there may be a chance to elect a Democratic senator there.

The Illinois legislature is safely Republican, and Senator Cullom will be returned.

Michigan went Republican by a hundred thousand. The entire Republican congressional delegation is returned.

Oklahoma and Indian Territory went Democratic and the constitution of the new state of Oklahoma will be made by the Democrats, who will elect three out of the five new representatives and probably two senators. The fight against Senator Bailey, known as the "trust senator," in Texas, has amounted to nothing and he will undoubtedly be returned to the senate.

Sioux Falls, S.D., Nov. 6—Thirty thousand majority for the Republican ticket is the lowest figure conceded by the Republicans. The ticket is governor, Cos A. Crawford; congress, Philo Hall, Col. W. H. Parker; lieutenant governor, H. C. Shober; secretary of state, D. D. Wip; auditor, John Hayes; treasurer, C. J. Harris; superintendent of public instruction, Thos. Lyons; commissioner of school and public lands, C. I. Laughlin; railway commissioner, Bur H. Lion. The legislature is thoroughly Republican, which insures the re-election of Senator Gamble.

St. Paul, Nov. 6—Governor Johnson was re-elected in Minnesota. With the exception of he and a judge of the supreme court all the balance elected are Republicans.

Chicago, Nov. 7.—Revised despatches at noon today including returns from some very close districts show with 19 districts missing the Republicans have elected 212 members of the sixth congress and the Democrats 155. The Democrats made gains in the following states: Illinois, Iowa, Missouri, Nebraska, New York, New Jersey, North Carolina, Ohio, Wisconsin, Maryland, and Pennsylvania. In Great New York though Hearst was defeated, the Democrats carried their whole ticket before the Governor.

## GREAT... OPPORTUNITY FOR MAKING MONEY...

ash, burn the best coal in the North-  
west from the Humberstone Coal  
Mines.

SOLE AGENTS

**THE UNIVERSAL COAL CO.**

OFFICES—Corner Jasper and 2nd Street

PHONE 151.

**LOCAL**

—The building permits for November  
up to this date amount to \$10,000.

—"Jerry from Kerry" was played be-  
fore a large audience last night at the  
opera house.

—The Royal Templars of Temperance  
held their usual session on Thursday  
evening in unity hall.

—Claude Amende's musical comedy  
company will appear this evening at  
the Edmonton opera house, in the "Mas-  
cot."

—The brick work of the new building  
of Revillon Bros. is completed and is  
completed and is now in the hands of  
the carpenters.

—John McDougall arrived in the city  
with his bride yesterday and is today  
being made the recipient of congratula-  
tions by his many friends.

—The intermediate hockey team will  
begin training this evening at their  
quarters at the Thistle rink. Trainer  
Geo. Scott will have the work in hand.

—A meeting will be held in the Al-  
berta hotel Friday evening at 8 o-  
clock for the purpose of organizing the  
city hockey league. All clubs desiring  
to enter are requested to send two  
delegates.

—The Palmier Sisters Concert Or-  
chestra Co., which last year deligh-  
ted an Edmonton audience will again  
give one of their entertainments in  
the city on the evening of November  
27th.

—The court of revision will meet  
in the council chamber, Nov. 20th, at  
5 p.m., to consider the voters' list.  
The assessor has posted a list in the  
general city office.

—A meeting of the Edmonton lodge  
of the Elks will be held on Friday,  
Friday, November 9, in Rennie's Aca-  
demy. A large number from the Cal-  
gary lodge of Elks will be present.  
They will arrive by special train Fri-  
day afternoon.

—Mr. H. A. Craig, director of Far-  
mers' Institutes for Alberta, leaves  
this afternoon for New Orleans, where  
he will attend the annual meeting of  
the Association of Farmers' Institute  
Superintendents.

—The executive of the Young Lib-  
eral club held a meeting last night  
at which it was decided to postpone  
the annual meeting of the club to the  
first Tuesday in December.

—Mr. Devonald, formerly of Lam-  
ont, died yesterday at the General  
hospital. The funeral will take place  
this afternoon from Moffat & Mc-  
Coppin's undertaking establishment at 2.30.

—The preliminary hearing of the  
Ansell case, which was set down for  
1.30 in the police court, was adjourned  
again today until tomorrow at the  
same hour.

—The Athletic Association of Al-  
berta college are preparing an open  
air rink. The size is 60x105 feet, with  
a fence 5 feet high. Cushing Bros.  
delivered the material this afternoon.  
The rink is for the use of the stu-  
dents.

—A real estate deal that has been  
completed for some time was announ-  
ced yesterday by Messrs. McGrath, Hart  
& Co., real estate agents of this city,  
who have purchased the property on  
Jasper avenue where John Somerville  
& Son's hardware stands. The property  
belonged to D. C. Cameron. Mr. Ma-  
grath stated the price paid was in the  
neighborhood of \$50 per foot.

—The secretary of the Edmonton  
hockey club has written the various  
hockey clubs throughout the province  
with a view to arranging a date for  
a hockey meet in order to form a pro-  
vincial hockey league. The idea finds  
favor with the public and it is confi-  
dently expected that before long  
something definite will be accomplished  
in this direction. It is proposed to form  
two districts, one south of Red Deer  
and another north and as far east as  
Saskatoon. Edmonton, Strathcona, and  
Calgary are enthusiastic over the pro-  
ject.

—The military lists containing the  
names of those who have signified their  
intention to enrol in the Edmonton in-  
fantry regiment have been sent to Ot-  
tawa. The list contains a sufficient  
number of names for over eight com-  
panies. In a previous issue of the Bul-  
letin it was stated that only four com-  
panies could be formed. This was with  
reference to a company in the Im-  
perial service at fighting strength  
which is 125 men. In Canada, however,  
the usual number is forty men to a  
company.

**SOCIAL AND PERSONAL.**

Mrs. John Ross will receive for the  
last time during the winter, Thursday  
afternoon and evening.

Mrs. A. Campbell Carmichael, Fifth  
street, gave a very pleasant "Tea"  
yesterday afternoon for her sister,  
Miss Toughburn, of Lindsay. Mrs.  
Campbell received at the entrance to  
the drawing room, and wore a soft  
dress of fawn voile with lace bertha.  
Miss Toughburn was wearing a  
dainty gown of India silk. The tea  
table was in charge of Mrs. (Er) Fer-  
rie and Mrs. (Dr.) Gillespie, while  
the loaves were served by Mrs. (Dr.)  
Reid the first hour and Mrs. But-  
chart the second. Little Miss Reid  
of Nelson, in a pretty frock of net,  
attended at the door.

**CITY NEWS**

GLENORA.

Caruthers Boudry & Co. are pulling  
on a new subdivision in the west end  
which is attracting a good deal of at-  
tention among those who are desirous  
of acquiring a nice home site. It is  
called Glenora, and is situated just west  
of Ingelwood subdivision adjoining the  
city limits and north of the Stony Plain  
road. The avenue, which are eighty  
feet wide, match the Ingelwood survey.  
The street is 60 feet wide and the  
lanes twenty feet, the same as in  
Ingelwood, and the lots are 50 x 140  
feet. It is high, dry ground, beautiful-  
ly adapted for residential purposes and  
as the west end is already becoming  
crowded it is the natural place into  
which the residences part of the town  
will spread. The owners are selling  
the lots at from \$125 up, one-third cash,  
and the balance in one and two years.  
They have fine lithographed maps of  
the subdivision, which they are giving  
away on application. The street is  
all brushed out and the corners are  
marked with guide posts so that in-  
tending investors will have no difficulty  
in finding their location. With the  
street car line built to Twenty-first,  
which will undoubtedly be undertaken  
by the city next summer, Glenora will  
be within only a few minutes' ride of  
the centre of the city. The sale com-  
mences tomorrow.

**DUCKWORTH'S BODY FOUND.**

What is believed to be the remains  
of the Englishman Duckworth, who  
was lost up the Saskatchewan river  
last June, were found on a sandbar  
at Buck Creek, 70 miles up the river  
from the city and a few miles below  
where Duckworth and his partner  
were working at the time they dis-  
appeared. The remains had been badly  
decomposed by water and partly de-  
voured by some wild animals, the  
clothing being the only means of  
identification. Duckworth and his  
partner were building survey mounds  
for A. Driscoll when they disappear-  
ed, and it was always supposed that  
they were drowned while trying to raft  
across the river.

**MILLER-FOUND GUILTY.**

In the supreme court this morning  
John Miller a youth of scarcely 20  
years, well known in the city, who  
has been employed as a carpenter's  
apprentice by W. R. Hill, was found  
guilty of stealing tools belonging to  
Grant Henderson and John Chaplin  
from the King Edward premises. Sen-  
tence was reserved until the close of  
the docket. Miller's mother was pre-  
sent in the court when the boy was  
found guilty and made a pathetic ap-  
peal to the court for leniency. A  
second indictment on the same charge  
was not pushed.

**Public Auction of Indian Lands**

There will be offered for sale by  
public auction, subject to a reserve bid,  
at the Dominion Lands Office Edmon-  
ton, in the Province of Alberta, on  
Wednesday the 14th day of November,  
1906, at 12 o'clock, noon, the following  
lands, comprising surrendered portion  
of the Michel Indian Reserve, No. 112,  
situate near Edmonton, viz.—Fr. sec.  
28, W. pt. sec. 29 and 31, Tp. 53, R.  
26; W. pt. sec. 6, 7, 18, 19, 30 and fr.  
W. pt. sec. 31, Tp. 54, R. 26; pt. of  
fr. sec. 29 and 21, W. 1-2 sec. 28, E.  
1-2 sec. 29, sec. 33 and E. 1-2 sec. 32,  
Tp. 53, R. 27; S. 1-2 and N.W. 1-2  
sec. 4, S. 1-2 and N.W. 1-4 sec. 9, sec.  
16, E. 1-2 sec. 17, sec. 21, E. 1-2 sec. 20,  
sec. 28, E. 1-2 sec. 29, S. 1-2 and fr.  
N.E. 1-4 sec. 32, S. 1-2 and N.W. 1-2  
sec. 34, R. 27; also those parts of sec.  
3 and 4, Tp. 55, R. 27, south of Stur-  
geon River, within Reserve, all west  
of the Fourth Meridian.

The lands will be offered for sale in  
quarter sections, cash, or one-fifth cash  
and the balance in four equal annual  
instalments with interest at five per  
cent. Accepted cheques will be taken  
in lieu of cash.

Any information regarding the lands  
in question may be obtained upon ap-  
plication to the undersigned, to Do-  
minion Lands Agent, Edmonton—or to  
Indian Agent, Stony Plain.

The unauthorized insertion of this  
advertisement will not be paid for.

J. D. McLEAN,  
Secretary  
Department of Indian Affairs,  
Ottawa, October 27, 1906.

## THE EDMONTON BULLETIN

DAILY—Delivered in City, \$4 per year. By mail, per year, \$3.

SEMI-WEEKLY—Subscriptions per year \$1. Subscriptions strictly in advance.

BULLETIN CO., Ltd.,  
DUNCAN MARSHALL,  
Manager.

WEDNESDAY, NOVEMBER 7, 1906.

## SIDE STEPPING

Supposedly replying to the Bulletin regarding the reported sale of land to the Southern Alberta Land Co., the Journal abandons its former position that such sale involved partiality on the part of the government and argues that the regulations under which the sale is said to have been made could have been changed. Whether or not they could have been or should have been changed is of course not the point raised by the Journal and considered by the Bulletin. They were not changed and the Journal accused the government of favoritism in making a sale in accordance with them. That this ground is untenable is admitted in the fact that the Journal now abandons it and wanders into a discussion of the merits and demerits of the regulations themselves.

## A FRUITLESS SEARCH

Those Conservative journals which scan the results of the bye-elections for signs of the waning popularity of the Federal Government, are finding little encouragement in the results in North Bruce, and in Shillburne Queens. In the former constituency a Conservative majority two years ago of 119 was turned into a Liberal victory by nearly 560 majority. In the far past Mr. Fielding was again returned by a majority nearly three-fold that given him on former occasions. This usual attempt of course, made to explain away these signal triumphs, on the ground of the personal popularity of the Liberal candidates, in some instances by the journal's most loudly protested of that the personal popularity of Mr. Robitaille bore no considerable part in determining the outcome of the contest in Quebec county. And in spite of their joyous proclamations a week since that the election of Quebec county paid little attention to the fact that Mr. Amyot was endorsed by Sir Wilfrid Laurier the same journals would now have us believe that it requires all but a miracle to persuade an electorate to elect the Government candidate in a bye-election. The Mail and Empire however appears to have captured the bun in its search for consolation in the Shillburne Queens result by declaring that the special "Fielding" majority in Queens and Shillburne is "calculated to intensify the growing feeling against the Ottawa politicians." The Mail does not, of course explain that said "feeling" appears to be confined exclusively to the minds of itself and its friends.

## A PLAN FOR CITY BEAUTIFICATION

The announcement that the Provincial Government has secured the services of a landscape architect to prepare plans for improvement of the grounds of the Parliament buildings recalls the plan suggested by a committee of the board of trade some time since for the beautification of the city and suggests that the matter might be taken up very advantageously at the present—probably more so than at any time in the near future.

The plan proposed by the committee of the board of trade was an elaborate one, and comprised a series of parks and open places (designed to accommodate the residents of all portions of the city with convenient breathing spaces, and, taken in its entirety, was intended as a broad scheme for beautification worthy of the capital of one of the Dominion's greatest provinces and a city destined to rank among the greatest on the continent. The relevance of a distinguished landscape architect in this city might well be taken advantage of and his services secured by the council to go over the plans proposed by the committee, making alterations, amendments or extensions which might be suggested to an expert by the conditions. The action is the more desirable that the architect in engaged to prepare plans for laying out the grounds of the legislative buildings with which the general beautification scheme of the city should be made to conform.

That Edmonton should have as a civic ideal a broad and comprehensive scheme of beautification should not require argument. Her present and her future as an industrial and commercial centre demand the provision of parks

and breathing spaces to conserve the health and pleasure of a population which will grow annually more dense, while the dignity of a capital city requires that she should be something more attractive than a collection of unromantic business houses intersected by noisy thoroughfares. A capital city should be more than the meeting-place of a legislature—it should be also a centre for the growth and dissemination of whatever makes for the intellectual development, the aesthetic cultivation and the moral uplift of humanity. These forces are produced neither under purely utilitarian nor exclusively aesthetic influences, but in the combination of the essential and the beautiful nowhere so well combined as in a city which is "great" both materially and in proportion for the cultivation of the finer sentiments.

Such plan should of course be treated as an ideal rather than an immediate program. It should not be postponed indefinitely, nor should it be undertaken rashly. "Fire things if it should be the motto here as elsewhere and the accomplishment of the ideal gauged by the means available. We have partially begun a program accepted as the ultimate goal, progress toward this could be made step by step as opportunity offered, as the financial strength of the city warranted and the development demanded; but with no such plan definitely before them the beautification of the city is likely to be neglected or the efforts of successive councils toward this end to be somewhat haphazard and lacking in the conformity and sequence necessary to ultimate satisfaction.

In connection with the proposal to secure the services of Mr. Todd, it is of interest to note that Calgary has engaged him to make a preliminary report on how the city parks should be laid out.

## A Range That Burns All the Coal

**M**OST likely you have been throwing away good coal every day without knowing it.

Coal that is only partially burned in the fire-box.

Because, with the ordinary range draft, the air current only strikes part of the fire.

Usually the damper door on such a range is situated at one end of the fire-box, which makes your fire hot at the draft end and cold at the other end.

Or the damper is perhaps on the left side of the stove, which makes an uneven fire for the same reason.

You are not only losing fuel, but your cooking and baking is unsatisfactory, for you cannot get a uniform heat.

Now, the draft in a Monarch Range is entirely different.

Instead of one damper door, there are two, one in each end of the fire-box.

These form a double or Duplex Draft, and both are regulated by the same handle.

So you get two direct currents of air at the same time, and your fire burns smoothly and evenly.

You open both drafts simultaneously and shut them off the same way.

The draft striking the fire from both directions consumes all the fuel, and gives you all the heating power from the coal.

When you empty the ash-pail in a Monarch Range, you are throwing away ashes—and ashes only—not coal.

And in addition to this, the Monarch is constructed of Steel and Malleable Iron, which can be riveted so tight and solid that no air-leaks can possibly happen as they do in cast iron ranges.

**Monarch**  
The Stay Satisfactory Range

The top is Malleable Iron, polished and bright. You can keep it clean without smearing your range with blacking which gets on the cooking vessels, to make more work for you.

A \$1.00 Cook Book Free

The Monarch Cook Book, written by Mrs. Helen M. Thomas, an acknowledged authority on domestic science is a Real Book, not a cheap circular, six pages bound in cloth on board covers—a book that would cost \$1.00 at the book stores.

It contains 350 recipes, many of them new, all simple, easy to make and inexpensive. Has practical menus for the whole year and many valuable hints on diet and marketing.

You can get it without cost if you intend buying a range or cook stove within a year.

HOW TO GET IT. Cut out this advertisement, mail it to the Malleable Iron Range Company, Beaver Dam, Wis., and tell them WHEN (stating month, if possible) you expect to buy and you will receive this valuable book free. As the edition is limited, write now.

The New Westminster Columbian has the following to say of the Edmonton-Strathcona exhibits at the B. C. Provincial Fair:

"The Garden of Alberta" which these two places assign to themselves, is represented by a wonderfully robust and varied selection of cereals. This is their main feature, but some very fine vegetables and specimens of hard coal from both places selling locally as low as \$3.00 per ton, are points of attraction.

"The two exhibits of Edmonton and Strathcona are separate, though shown together. Mr. Thomas Daly, whose enthusiasm about this district is absolutely catching is in charge of the Edmonton section, while Mr. James Porter is looking after the Strathcona part of the show. The various products shown are practically identical from each district, the banner cry of each being "Banner Oats". It is a sight to make glad the heart to see the splendid sheaves of oats and spring and fall wheat that a middle-height man standing up might hide himself behind easily, and he would want both arms to lift them. Mr. Daly states that Banner oats have yielded him as much as 100 bushels to the acre. Clover 2 feet high, alfalfa pea vine, slough grass 4 feet high, and flax are staples of both exhibits. Amongst vegetables splendid potatoes are shown in each and the Edmonton Cauliflowers are a sight to make the mouth water—large and white and very heavy. The Strathcona side also has a very fine showing of celery. To revert to Banner oats, Mr. Daly shows a photograph of himself the proud holder of a large silver cup gained by him at the Edmonton Seed and Grain fair for a two-bushel exhibit, representing 1000 bushels of these oats. He wishes it to be known that he has some 3,000 bushels of these oats for seed, as he does not see why they should not be introduced to British Columbia. A large number of photographs of the Edmonton-Strathcona country and of many grain exhibits are a feature of the display. Mr. Daly says that he is tired of getting exhibits together, but they are so necessary. He is surprised at the ignorance of his country shown by British Columbians, but he is willing enough to admit that the ignorance is not all on one side. His own people have no idea of the variety and extent of the agricultural productiveness of British Columbia. At the same time with a twinkle in his eye, he points to his own splendid grains with the remarks that though they are not as pretty to look at as the fruit pictures displayed in the local shows yet they provide everything to sustain life. The whole fact of the matter is that the country which his own products are rapidly populating promises to be one of the finest markets, and practically an unlimited one for British Columbia fruit.

Mr. Daly has started a plan in his own district which he has found to succeed admirably for fostering local juvenile interests in farming. He has already some 28 boy farmers interested. These are boys between 14 and 16 years of age, and to each of these he gives a bushel of Banner oats for seed, and to the boy who can produce the best two bushels of grain he awards a silver medal. This is an idea worthy of local imitation. As for stock Mr. Daly and Mr. Porter have many photographs of superb cattle—champions everywhere they go. If you ask Mr. Daly about the feed question he will take you to two prominently displayed photographs labelled respectively Summer Feed and Winter Feed. In the first the stock are standing up to their middles in the natural growth. In the second they are grouped under great mounds of stored up fodder. That this interesting exhibit should have been brought from so great a distance is certainly a tribute to British Columbia's increasing influence on this continent and the moral of it may be summed up in the maxim "Hands together, and all parts of the country working for each other and the Dominion."

## Civil Cases

Mr. Cogswell of McKinnon & Cogswell was present as Crown prosecutor. The first case called was that of Wm. Kerr, charged with having broken into Hyslop & Nagle's store at Athabasca Landing last June and having broken away from the Mounted Police on the Fort Saskatchewan trail while being brought to Edmonton after having been committed for trial. Kerr pleaded guilty on both charges and the sentence was reserved until the close of the criminal cases.

The D'Amour case which is probably one of the most interesting of cases in the list will probably go over until some later date, most likely in December.

D'Amour was a mail clerk on the C. & E. road and is charged with having pilfered the mail sacks on or about May 1st between Wetaskiwin and Ponoka. H. H. Robertson and Wilfrid Gariepy are defending D'Amour's case and they started with a lively list of objections, the first of which was

that the young man had been tried on a charge so similar that it was practically the same case by Cogswell and had been dismissed, and that later he had been committed for trial by the same authority. Mr. Robertson challenged Captain Worsley's jurisdiction to charge or commit, assuming that by a technical slip of the tongue passed at the last session of the legislature Captain Worsley ceased to be a justice of the peace on May 31st. Mr. Robertson also objected that there was no warrant of commitment.

Chief Justice Sifton over-ruled the preliminary objections, stating that the commitment could be rectified if it was found necessary to do so.

Crown Prosecutor Cogswell then stated that he wanted a day set for the trial some considerable time ahead, preferably in a month hence, so that he would be able to get witnesses who were on the mail run between here and Montreal gathered in the city to give their evidence.

Mr. Robertson protested that if the case was to go over his client should have been asked that the date be set at some time subsequent to the Christmas holidays, as he also had witnesses whom he would like to assemble if possible. D'Amour pleaded not guilty and the date for his trial will be set this afternoon.

John T. Culp, charged with perjury at the trial of William Bruce Hardy for assault, committed at the international hotel, pleaded not guilty.

Carl Vanille, an Italian laborer who had been employed on the C. P. R. at Leduc, charged with assault, pleaded not guilty. Vanille cannot speak any English and when his name was called he jumped to his feet and did a military salute to the court which indicated that he learned fighting in the army before he started it on the railroad gang. His case will be defended by Dubuc & Dubuc and will be placed near the foot of the list to allow Vanille to bring some witnesses in from Leduc.

John Miller, on two charges of road stealing, pleaded not guilty. He will be defended by Mr. Brown.

Henry Mitchell and Mike Mahoney, charged with gross indecency committed at the international hotel, pleaded not guilty. They will come up tomorrow.

The first case to be taken up was the charge of false pretences laid by Elmer, o Johacco against Joseph Schenck, arising out of a deal with regard to Lots 3 and 4, Block 10, River Lot 12. Johacco was the first witness placed on the stand, and as he talks no English Phil Wagner acted as interpreter. According to the case which the crown is trying to establish, Johacco sold the two lots in question to Schenck for \$750, and gave what he thought was an agreement of sale for the lots in three payments, one third cash, and the balance in six and twelve months. He also got two collateral notes for the deferred payments, the first of which was due on July 17 and was not paid. In the meantime Schenck transferred the lots to his wife. It now transpires that it was an assignment which Johacco signed instead of an agreement of sale.

The case will probably occupy the time of the court all afternoon.

## TELEGRAPHIC

### ANOTHER WIN FOR THE JAP

San Francisco, Oct. 31.—A Japanese athlete is now champion short distance runner of the world.

Mimoru Fujii, a student of the Imperial University of Tokio, performed the following feats—Ran 100 metres (109 yards plus) in 2 24-100 seconds, and pole vaulted 12 feet 7-100 inch. The performances were certified to by the president of the university, and the physical director, who sent a letter to the Japan Daily Mail and to athletic authorities in Great Britain and the United States, asking that they be accepted as records.

### TORE UP THE RAILS

Brandon, Man., Nov. 1.—The Great Northern railway tracklaying gang camped out on the Canadian Northern last night, when they reached the crossing just southwest of the city, at which the Canadian Northern jangled in last week and laid their steel for a short distance, hoping thereby to gain prior possession of the crossing.

The tracklaying gang of the Great Northern reached the crossing last night, and when the big foreman saw the rails across his path, he quickly sized up the situation, and, calling to his men, about two hundred in number, "This is no railway, come on and throw it to one side," the Canadian Northern rails and ties were in a very short time torn up and taken out of the route of the Great Northern who quickly laid their rails and the crossing was made.

There were no Canadian Northern officials present at the time; evidently they were of the opinion that their rails would hold up the other line. The Great Northern rails will reach the city tonight or early in the morning.

### CHARGED WITH ABDUCTION

Penhold, Alta., Nov. 1.—Yves, a Walter Shuh appeared before Magistrate Cowell, at Red Deer. He was charged with assisting to abduct Alena McKenzie, the daughter of A. D. McKenzie of Penhold.

## City Council

(Continued from page 1.)

tions for 1906 were under way, the city leased the grounds for a year with an option to purchase at \$60,000, the \$3,000 to be a part of the purchase price.

Acting Mayor Picard said that the option should not be allowed to lapse without the ratepayers being given an opportunity to say whether they did or did not want to purchase the property.

There was some question raised as to whether the lease and option was ever signed and therefore Ald. Griesbach moved that the commissioners and city solicitor be instructed to frame a bylaw and take such action as would provide that the bylaw should have force and the property might be acquired providing it be carried by the ratepayers.

The date of the court of revision for revising the municipal voters' lists was set for November 20th.

The secretary-treasurer pointed out to the council that it would be necessary to have an adjourned meeting in order to take advantage of the Caribinium Block company's offer unless an order was placed by wire, as their offer expired on Nov. 15th, and as the contract settlement and the exhibition grounds matter all called for prompt action it was unanimously decided that an adjourned meeting should be held on Friday evening.

Vermilion Signal: A. G. Harrison, agent of Dominion lands at Edmonton, spent Thursday in Vermilion. This was Mr. Harrison's first visit to the place since it began to grow. Like everyone else who is familiar with its history, he was unprepared to find a town of anything like its proportions and substantial appearance. Mr. Harrison has formed a very high opinion of Vermilion and knows of no new town in the country which has a more promising outlook.

RECEIPTS AND WARNINGS FOR  
THOSE WHO WOULD  
DYE WELL

## Dye Well

Let thy faith be fixed in the wonder-  
ful transforming powers of DIAMOND  
DYES; this results they give will ever  
thine heart.

Never allow any interested or wily  
dealer to recommend for thy use some  
inferior or imitation make of dye. If  
thou wilt hearken to his words he will  
rejoice at thy simplicity of character  
and will delight himself over thy wrath  
and bitter disappointment.

If thou wouldst avoid handling poi-  
sonous ingredients, use only the DIA-  
MOND DYES for thy home dyeing  
work; they are the only harmless and  
pure dyes.

When times are hard and money  
scarce, thine heart often craves for new  
and stylish colors and garments. By  
the use of the magic DIAMOND DYES  
thy wishes can be fully realized, be-  
cause DIAMOND DYES recolor old  
dresses and make them look like new.  
If thou wouldst have a smiling face,  
a happy heart, and an easy mind, do  
thy coloring at all seasons of the year  
with the DIAMOND DYES; they never  
cause worry or grief to those who make  
use of them.

Send to Wells & Richardson Co., Lim-  
ited, 290 Mountain Street, Montreal, P.  
Q., for valuable Dye Book and Card of  
Dyed Samples; free to any address.

TAKE NOTICE that an application  
will be made to the Parliament of  
Canada at its next session, for an Act  
extending the time for the com-  
mencement of the works authorized  
to be constructed by The Athabasca  
Railway Company for a further term  
of two years, and to extend the power  
of the said company by authorizing  
them to build a railway from a point  
at or near Fort McMurray at the  
junction of the Athabasca and Clear-  
water Rivers northerly to Fort Smith  
on the Slave River.

## STRATHCONA.

Yesterday afternoon Edmonton's city engineer, R. R. Keey, and Mr. Morrison, the electric expert, now here in connection with the automatic telephone system, visited Strathcona and informally discussed the proposed system at length with Mayor Sheppard, of this city.

Mr. Morrison presented a large number of new points and made clear many of the difficulties that had apparently stood in the way with regard to better telephonic communication between the two towns.

There are four solutions of the question that now confront the Strathcona authorities:

(1) Placing the present municipal system on a metallic circuit with new switchboards, and it could then be connected with the Edmonton automatic by manual as long distance at the central office.

(2) Installing a new system along the lines of the present one.

(3) Installing an automatic system similar to the Edmonton office with a central office and at proportionate cost.

(4) Giving a franchise to Edmonton and allowing them to extend their system to this side, where subscribers would get their phones at the same cost as Edmonton users.

This scheme, it has been asserted, would work perfectly and would avoid the cost of a second central office. The last proposition was considered most favorably by the Strathcona council when it came up before them last night. The new system is strictly automatic and private, and one instrument out of order does not interfere with the working of the exchange, which the company guarantees.

The price to subscribers, Mayor Sheppard pointed out, would be no higher than at present and may later be lowered. It would undoubtedly be a good paying proposition to Edmonton, but Strathcona would get the benefit of the reduction in rates and save expense.

The installing of a similar separate system would cost Strathcona about \$30,000. The present system will be useless unless it is metallic circuit.

The feeling of the board was in favor of granting a franchise to Edmonton should that city apply and Mayor Sheppard suggested that the question be not in shape and submitted to the citizens at the coming annual meeting.

#### STRATHCONA COUNCIL.

Though the council were in session till eleven o'clock, little business of an important nature was transacted; there was considerable interesting discussion, however, and much valuable information given out. Mayor Sheppard occupied the chair, and there was a full board present.

After the approval of the minutes, etc., a number of bills were passed and then communications read: the most important of these were from the Carey Manufacturing Company, offering an incinerator similar to the one purchased by Edmonton, the department of public works, Ottawa, re a light on the Saskatchewan bridge, and improvement of approaches, and John Walter, asking for water extension and hydrants near his mill.

With reference to the bridge the mayor said the Strathcona approach was now better than the opposite one, but if wiring and lamp were furnished by the government the town might supply the current. The secretary-treasurer was instructed to write the resident engineer at Calgary.

B. Brown, Fred Sache and Chas. Nesbitt appeared with reference to over-assessment and reductions were allowed.

The solicitor gave as his opinion that the collection of a license fee from Taylor & Simcoe was legal; it was ordered that the fee to Henderson Directory agency be returned them; and the health and relief committee had referred to them the case of a poor woman living near the bridge with four children and whose husband is ill with typhoid fever in the hospital.

The question of cleaning snow from the sidewalks was discussed and it was agreed that the by-law be enforced. Where there were vacant lots the city would do the work and charge it to the frontage. The mayor in this connection condemned the four-foot sidewalks, which were a nuisance in time of snowstorms.

A communication from the C. & E. with reference to their share of the proposed sidewalk to the bridge, brought out the information that it would cost \$350 without the excavation.

Councillor Elliott brought up the lack of accommodation at the hospital, where the adjoining house used by the nurses is entirely inadequate. The question was left with the hospital committee with power to act to the extent of \$750.

Mr. Pierson, of the Alberta Transfer company, asked if a license for their two teams, handling coal alone, would be collected. The board decided

## WINNIPEG MARKETS.

## (Commercial)

Produce—Potatoes 50c per bushel, carrots 40c; turnips 50c a bushel.  
Cheese—Ontario is quoted at 15c; Swiss 15c; cheddar 15c a dozen; red cabbage 90c a dozen; beets 50c a bush 1 1-2; twins 15 1-2c; and Manitoba at 14 1-2c; twins 15c.  
Butter—Creamery — Jobbers are asking for choice creamery, fresh churned, brickets, 30c per lb.; held butter, brickets, 27c; bulk, 25c.

Butter — Dairy — Jobbers are paying for selections, 21c; good yellow boring, 18c; pastry, 16c.

Eggs — Advanced another 1c this week. Winnipeg jobbers are paying 23 1-2c for fresh eggs at Winnipeg; glycerized eggs are quoted at 25c.

Dressed Meats—There is a good demand for fresh meats. Prices remain unchanged. We quote: Best 5 1-2c for city dressed; mutton, fresh killed, 12 1-2c; veal, fresh killed, 8 1-2c; dressed hogs, abattoir killed, 11 1-2c; lamb, 16c.

Poultry—Jobbers are paying for live weight: Fowl, 8c; chickens, 10c; turkeys, 14c; ducks, 8c; f.o.b. Winnipeg.  
Hides—There is still no change to report. We quote: 8-400 3-4c for country hides; sheepskins, 25c; 40c.  
Tallow—No. 1 tallow is worth 4 1-2c per lb.; No. 2, 3 1-2c, delivered to the trade.

## LIVE STOCK.

Cattle—There was a big movement of cattle this week, and a large number were exported. We quote: best butchers' cattle at 3 1-4 cents; lower grades 3c. Good export cattle are 3-1-4c to 1-2c; cows 3c, weighed off the cars. Winnipeg buyers assuming freight charges.

Sheep — Choice mutton sheep are worth 6c; and lower grades 5 cents; lambs 7 1-2c.

Hogs—Live hogs from 150 to 250 pounds are bringing 7 1-2c; 250 to 300 pound hogs 6 1-2c off the cars at Winnipeg.

## THE FROCK COAT SUIT

A New York Artist Delivers the Correct Style for Men.

In the book "Manners and Modes for Men," there appears a reproduction of an old painting by a New York artist, showing the front and back of the new frock coat as produced in Semi-ready tailoring. Frock suits, silk-faced, are sold for \$15 and \$30.  
Frock coats are the best of the new tailors, for they can give the easy flow and yet retain the correct fit. It is easier to make a tight fitting garment than an easy fitting one. The Semi-ready Overcoats are worth seeing too, particularly the new French Overcoat in the \$25 and \$30 patterns. "Semi-ready." Kelly & Moore will show the real Semi-ready label to anyone. It is on the inside pocket of coats, trousers and overcoats.

## The Mark of Winter Comfort

WHEN you buy Felt Shoes and Slippers, see for yourself that you get the ELMIRA FELT. THIS TRADEMARK appears on the SOLE of every GENUINE Elmira Felt Shoe and Slipper. Look for it, and take none without it.

It is the sign of quality—the guarantee of warmth and wear.

For foot comfort in cold weather, there is nothing to equal ELMIRA FELTS.

SOLD BY LEADING DEALERS

## Blue Ribbon

## BAKING POWDER.

Better than Soda and Sour Milk and Cream of Tartar

Because the acidity or sourness of different lots of sour milk is hardly over the same so the cook never knows just how much soda is needed to neutralize it. She can only GUESS, and guessing always means a chance of mistake. If too much soda is used, the biscuits will be yellow; if not enough, they will be sour.

With cream of tartar, there is no such trouble, for the acid strength of commercial cream of tartar varies widely in different samples.

There is no guessing with Blue Ribbon Baking Powder, for the ingredients are proportioned with chemical exactness. You know EXACTLY how much to use.

Sold by the Best Grocers. 25c a pound.

**Don't Forget the Main Point**  
in buying is to make it pay. The more cream you can get, the more pay, providing you do your skimming at the smallest cost in time, labor and running charges. You can make it pay most, with least trouble and smallest expense, by using the improved

**U. S. Cream Separator**

"I purchased a No. 1 U. S. Cream Separator last April. I have only three cows, but since the 21st of last April I have sold 67 1/2 worth of cream. I find it so profitable that I will be glad to see it in every light and see how the improved

**Gets the Most Cream**  
and Holds World's Record for Close Skimming"  
A little figuring will prove to you that Mr. Green's separator is worth its cost. It is a year per cow unless he does not get all the cream.

Send for handsome booklet, "The Best Skim"  
"The Dairy and How to Make it Pay the Most."

**THE GURNEY STANDARD METAL CO., LIMITED, CALGARY.**

**SEALED TENDERS** addressed to the undersigned, and endorsed "Tender for Public Building, Edmonton, Alta." will be received at this office until Wednesday, November 28, 1906, in-clusively, for the construction of a Public Building at Edmonton, Alta.

Plans and specification can be seen and forms of tender obtained at this Department, on application to Mr. R. J. Manson, Clerk of Works, Edmonton, Alta., and Mr. J. Greenfield, Supt. of Public Works, Winnipeg, Man.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,  
**FRED GELINAS,**  
Secretary.

Department of Public Works,  
Ottawa, October 29, 1906.

P.O. Box 956. Edmonton

Coming!  
Learn Dress-Making

in four days, or learn by mail  
in your spare time at home.

Mr. and Mrs. Wm. Sanders, of the Sanders' Dress-Cutting School, Stratford, Ont., Can., will visit this place on date given at bottom of advertisement, and will show how you can learn to cut, fit and put together everything in dressmaking. Course consists of eight lessons which are:

1st Lesson—How to take a correct measure. How to use the Elite Ladies' Tailor System to fit anyone.  
By the time you are through with this lesson you will know as much about cutting as if you worked in a shop six months or a year, and gave from \$5.00 to \$25.00 for a system. In this lesson you test the perfect fit of system by making a waist for yourself or friend.

2nd Lesson—How to cut the different styles in lined waists, by draping, pleating, yokes, revers, boleros, etc., and putting all together. Fitting and particulars to finishing.

3rd Lesson—How to cut different kinds of sleeves and put together.  
4th Lesson—How to cut different kinds of yokes, berthes, collars, girdles and cuffs.

5th Lesson—How to draft to cut skirts by measurement by using the rule of system only; any kind of skirt, no matter what style, can be more easily cut than by using patterns.

6th Lesson—Finishing skirts, cutting costs, etc.

A few reasons why it is the best way to learn. (1) Because it costs no more than the making of one dress. (2) It only takes four days personally, or a couple of weeks by mail. (3) The whole family can learn from system and lessons you take home. (4) I have had thirteen years' experience in dress-cutting and teaching. Have taught over six thousand pupils and all were more than satisfied. I guarantee to give \$500 to any one who can't make a perfect fit after they are through—and you don't pay until you are through and are perfectly satisfied. Don't forget to call on Saturday. Farmers' daughters, and ladies who have worked at dressmaking, or apprentices, specially invited.

**MRS. WM. SANDERS,**  
Inventor and Instructor.

Will be at Yale Hotel, Calgary, from Saturday, November 24th, to December 1st. At Windsor Hotel, Edmonton, from Saturday, December 8th to 15th, showing method of teaching and enrolling pupils. Will be teaching in each place the week following. Don't miss this opportunity if you have any desire to learn dressmaking.

## How it Feels to Go Up in a Balloon

A. W. Rolker, in the American Magazine.

No matter how naturally fearless you may be as the hour of your first balloon ascension draws near you give the matter thought. There, over-weighed to the ground by means of sandbags hung about the outside of the car, you are a house-high sphere, distended tight as a drum head, gently swaying back and forth like a heaving, breathing monster impatient to whisk you skyward a mile or more, clear out of sight. Involuntarily you gaze upward at the fleecy clouds hanging in the blue heavens. They, too, are a mile or more straight up—a reflection that never bothered you before. It strikes you then that an awful distance is a smile on end. The hour for ascension is almost invariably late afternoon, and you wonder why he aeronaut prefers to sail at night and why he is like—Once those fleecy clouds have melted into darkness and you have drifted through space scraping heaven itself and hovering like a good, or an evil spirit above this sleeping world. Nothing but the reflection that men have successfully accomplished this feat thousands of times before assures you, and you begin inspection of your aerial armory.

### TERMINAL SMALLNESS OF THE BASKET YOU SIT IN

But what strikes you most as wholly inadequate and absolutely small is the little car or basket your pilot expects you to get into. The sides of the basket extend between your thighs and your waistline, depending upon your own height. Instead of being round as of old and thus permitting you to be rolled as if in a barrel in case your balloon runs away with you upon landing against a high wind, the car is rectangular, almost square, insuring that when dragged it slides over the ground on a side. A three man car, weighing 400 pounds, consisting of inch-and-a-half thick wire mesh carrying 250 pounds of ballast besides anchor ropes, etc., seems to you scarcely bigger than a large sized wash basket and measures a puny 3-4 by 3 feet. A five man car weighing 900 pounds intended to be attached to a balloon 40 feet in diameter containing about 35,000 cubic feet of gas measures only 4-1/2 by 4-1/2 feet; a car intended to carry as many as ten passengers measures only 5-1/2 by 6 feet.

No matter how large or how small the car, it is a matter for storing the greatest number of things within the smallest conceivable space. The ballast consisting of stones and sand, hangs on the side and outside the car in bags weighing from 20 to 40 pounds, and in this manner, also, is stowed the anchor. It like a yacht's anchor in appearance and to all purposes, weighing from 50 to 100 pounds, depending upon the size of the balloon, and is attached to a young hawser from 70 to 80 feet in length. Inside the sides of the car are lined with an array of canvas pockets for the stowage of food, drink, clothing, life preservers and a whole raft of instruments. Among these are a compass and a map to give direction, a barometer to indicate the varying temperatures throughout the time of day.

Coiled on the ground and attached to the car is a one-inch rope 250 feet long known as the "guide rope," which dangles from the balloon throughout the flight. As if it were an enormous tail and which secures the balloon in its flight just as the lead on a keel "stretches" a yacht. But the guide rope has a yet more important purpose, that is, what the track is to a railroad car this guide rope is to the balloon. As the balloon approaches earth to make a landing, manœuvres the tip of its rope coiled under the car, and the nearer the balloon descends the more of this rope-tail is dragged along the ground, thus automatically relieving the balloon more and more of weight and assuring at worst a comparatively gentle descent.

Every strand, every rope and knot and splice about the cloud sail has been inspected. The anchor rope, the guide rope, the white rope leading up through the inside of the balloon to the escape valve in the top of the envelope, and the red rope connected with the "rip cord" upon which the pilot depends to tear the balloon wide open and release all gas at once the instant you touch earth, have been coiled and stowed away ready for instant use.

The object in inducing pleasure, your pilot will explain, is not the sky-rocket, spectacularly up 9,000 or 10,000 feet, sacrificing precious ballast, only to find yourself in a below zero temperature gazing down without seeing anything but the upper sides of clouds that lie like an ocean of impenetrable fog beneath you. The aim is to rise gradually and steadily about 500 feet a minute until you have attained an altitude of 2,000, from when you can view distinctly the world panoramic view below.

### HOW IT FEELS—WHEN THE EARTH BEGINS TO SINK

You follow your pilot into the car. One by one the extra bags are thrown off, their places being taken by men temporarily bearing their weight on the edge of the basket until all is ready.

"Let go, everybody!" shouts your pilot, and as the human weight is released the first of a series of strange phenomena strikes you. For it is not as if you were moving upwards or leaving the earth. It seems as if the earth were leaving you. Your balloon seems to you to be standing perfectly still as if suspended by an invisible hand while the earth recedes back, back, at the starting rate. You look over the top of your basket at the people with whom but an instant before you were rubbing elbows and you gaze into a multitude of upturned faces cheering themselves blue and at a forest of arms waving hats and flags and handkerchiefs. Even as you gaze the faces blue and fade, while the decreasing noise of the cheers gives you an idea of the rate at which you are travelling away and not the earth. You do not feel the least sensation of up-

while in the elevator of a hotel office, upward movement of the sort you feel building. On the contrary, so indescribably smooth and easy in the motion that there seems to be none at all and were you blindfolded and were it not for the receding sound from the crowd below you would not know that the balloon had left the earth, and you might be tempted to step overboard into space.

### HOW THE WORLD APPEARS—

WHEN SEEN FROM ON HIGH—As you look over the edge of the basket one of your first surprises is that you do not become dizzy as you do when peering over the edge of a skyscraper, or when in the street. As a matter of fact no one is ever affected by dizziness no matter how susceptible he may be to dizziness when viewing from stationary altitudes. Your own pilot, veteran of a hundred ascensions, may perhaps not trust himself to gaze into the street from an ordinary sized three-story house; yet, for some mysterious reason the view of a thousand or more feet from a balloon never affects him. Down upon the weathercock of the church whose height used to fill you with awe you gaze as unconcerned as if you were looking from an upper box to the stage of the theatre.

As a matter of fact, below you is a gigantic stage setting so vast, so beautiful and so strange that its contemplation drowns all sense of fear. The earth which formerly seemed flat to you, now has the aspect of a gigantic bowl above the deepest part of which you are hovering like the bird of prey whose realm you are invading. Inside the bowl is a relief color map of the surrounding country irregularly and in glorious shades of green woods and forests, golden fields of rye and wheat and oats, and silvery hands of rivers and threads of brooks and streams, studded with tiny Noah's-ark houses and barns and trees and churches.

### EFFECT UPON YOUR EARS, EYES AND SPIRITS

While you ascend you wonder what is happening to your ears. They feel stopped up as if you had cotton in them and you must swallow often or blow your nose at intervals to clear them out. They will begin to pain slightly, just as ears pain and feel stopped up when you pass through an air lock into a higher or lower pressure. At worst, however, this inconvenience is but slight and there are compensations. You wonder why it is that the strength and clearness of your vision seems vastly increased. You feel full of strength and vitality and the intoxication of cloudland.

### TRAVELLING AT HIGH SPEED WITH NO SENSE OF MOTION

Many minutes pass before you are able to realize all the strange sights and sensations crowded in upon you. By the time you find yourself wondering if it is not about time for your balloon to move forward, you look below for a final view of the crowd. It is not there. For all the time you have been travelling forward, perhaps at a speed of 20 or 40 or even 60 miles an hour, without feeling it. Only by observing the passing

of the fleeting scenery beneath can you get an idea that you are not standing still. Literally you are travelling on the wings of the wind, no slower and no faster, wherever there is no breeze to let you estimate your speed as there is when you ride in an automobile. Whatever disaster might happen ultimately were you caught in a hurricane blowing 100 miles an hour while you were in the grasp of a storm you would feel a mere wind from an ant climbing to a tuft of this-tiedown blown in a zephyr.

At 2,000 feet your altimeter tells you that your balloon has come to a balance. From here you look down and discern black specks of human creatures standing still seemingly or crawling forward at a snail's pace. The specks you see however through the sky above trees and house-tops like so many moquitoes are birds flying high in air. Gazing upward you see the sky clear and blue and transparent as if you might view into the depths of heaven itself. And above you disoriented into the burning point, hovers the mighty sphere, steady as a church majestic in its might.

### SOUNDS OF THE EARTH THAT REACH YOUR EARS

From far below comes the rumble of humanity. Faint and distant as a voice is borne over a wire into the receiver of a telephone, you hear the crying of a baby, the voice of a man calling, the rumble of a wagon crossing a bridge, the clatter of horses' hoofs against stones, the barking of dogs and the thunder of waterfalls. You see a sudden orange in your own ears, as if you were talking inside of a barrel. Each word is chopped off short, and without reverberation, like the puny snap of a air-shooter when fired at sea. You might call it loud as your lungs would permit, your voice would carry in these altitudes about three miles to the occupants of a car and a dozen echoes would answer you out of the depths of the big gas bag over your head, still your voice would sound subdued as if you had not cried loud enough.

What is your next move once you have attained this topsy-turvy land depends entirely upon the circumstances. If you have found satisfactory breezes you continue at your present level, travelling with the wind whether it switches you at ring angles to your original course or whether it suddenly backs and takes you over the roadway. If the wind is not strong enough your pilot begins to "fish" for breezes in higher altitudes where there is a maze of currents and cross-currents of air blowing at varying speeds. A thousand feet above it may be blowing a baby hurricane northward, whereas at your own level there may be a bare four-mile breeze bound for the south.

### DROP A HANDFUL OF SAND AND GO UP TWO HUNDRED FEET

It is while discharging ballast to enter the higher altitudes that you get your first idea of this hair-trigger game of keeping you aloft. Your pilot takes a few wooden scoops no larger than ordinary sized spoons, dips into one of the sand bags and scatters a single shovel-ful overboard. Up goes your balloon 100, 200, 300 feet. An ordinary sized scoop of ten spilled overboard lightens the balloon enough to send it up 250 feet, and if you happen to be over a vacant field where you can drop

the bottle itself without fear of killing a man, you release this weight and send you up another 300 feet. So delicately poised is your balloon once it has struck its balance that you can push it up or pull it down from 300 feet with strength equal to that of your little finger. When a mere cloud passes between you and the sun causing instant contraction of the gas in the balloon, the envelope becomes baggy and flaccid at once and you begin to fall, sometimes at the rate of a thousand feet a minute, although you have no warning of this other than the shuddering and no sensation except the thrill as you see the alarming rapidity with which the earth comes nearer you. Three or four scoopsful of may be necessary to sacrifice before you again strike your balance, and the next moment the sun darts from behind the cloud, warms the balloon, and the envelope tautens almost with a bang, and you go kicking upwards under your lightened load, until you are obliged to open the escape valve, to let out gas to prevent going above your original level. Then it is that you begin to understand why the tug-war of the ascension is alternate cloud and sunshine, why he prefers sailin' during the night and why, if he does sail throughout the day, he mounts high above the clouds in continuous sunshine where the volume of gas in the balloon remains constant.

When you come near the clouds you find that they have a different aspect than when viewed from the earth below. Like mountains and avalanches of snow they rear above you as if to topple upon you and crush you. As you enter the clouds you find that they are as tangible to touch as they are to sight. As the top of the balloon enters the grey mist, sometimes so dense that you cannot see the man within two feet in front of you—lightly, if a spider's web were drawn across your head and face and hands, you are enveloped in a fog that is either hot and gummy and murky or cool and refreshing. Sometimes at 2,500 feet sometimes at 3,000 feet, you meet these clouds, and as you pass above them as if rising from a deep well, into a clear sky, a wonder is literally cut off from view of earth. Beneath you, stretched far as the eye can see, lies a bed white as snow, apparently so solid that you might be tempted to step out and walk on it. In the distance myriads of snowy sheep seem to be grazing body to body and head to head. Clouds like mountains of snow tower on all sides and roll majestically into fantastic forms and fairy could-scapes.

### FALLING INTO A "HOLE IN THE AIR"

And so you come sailing, enjoying the present with little thought of the startling surprises that may be before you. Ahead of you, unseen, may be what the balloonist calls, "a hole in the air" resembling the vortex of a maelstrom, and down this you may literally fall at a rate which is terrifying until by sacrificing two or three bagfuls of sand at once, your pilot chooses your downward flight. But these "holes" are scarce, and as a rule the atmosphere is of a uniform carrying power.

### THUNDER, LIGHTNING AND RAIN HEARD AND SEEN FROM ABOVE

Still another startling spectacle is to have over a thunderstorm deluging the earth and sending bolts of lightning on-

to the heads of humanity. Above you is the sky, bright clear, and of liquid blue. Below you is an angry, seething rolling sea of pitchy clouds overcharged with electricity. Clouds roll upon cloud, blinding flashes of lightning rending the black mass amid deafening peals of thunder. The hissing of torrents pouring earthward strikes your ears and you wonder after all if you would not be safer below than above. You speculate how you would look were your balloon to sink into those clouds and were lightning to strike the gas bag—and a 1 lb. while your balloon is sinking gradually. Owing to the air contracts, and only the unloading of sand prevents you from entering the danger zone.

### DRIVING A BALLOON THROUGH THE BLAACKNESS OF NIGHT

But until you have travelled in a balloon at night can you say that you have exhausted the gamut of awe-inspiring emotions. As early evening looms, the sun dips like a glorious molten globe set in a sea of purple and carmine blending into the seven colors of the rainbow playing into the bluish of dawn, semi-transparent cloud-scapes below you. Gradually you are enveloped in darkness, the air becomes chilly, the gas in the balloon loses its buoyancy, and you descend never earth.

Now you can trim your balloon to skid at any desired height—just skimming trees and house-tops if you wish how it feels take 2 continued—and, harking sudden chills, due to the sailing across sheets of water, it maintains its level without much variation. With the falling of the light occasional noises that have come to you from earth cease more and more, and you are driving through the darkness of the sky at a speed you cannot believe to estimate, and amid a silence that hurls your ears. The cry of night birds from the black depths below tell you that you are crossing over a forest. This croaking of frogs does a marsh or a swamp. The red light glare you see climbing into the sky in the distance, as if it were the reflection of a prairie fire, is a fire owned to the feet of lamps of a city, and the tongue of flame you see picking heavenward now and then are from blast furnaces. Ten chances to you you cannot tell the name of the town.

### SPEAKING FROM A BALLOON TO A YACHT

Sometimes however, as happened only a few weeks ago to Mr. Julian P. Thompson during a flight from New York to Noank, Conn., you have the chance to approach earth near enough to inquire your whereabouts. The Nirvana happened to be over Long Island Sound, when the balloonist hailed a passing party and asked the name of the town, which was Bridgeport, Conn. But not always is it possible or expedient to inquire, and generally you skim over a city with its rows of smoking and sparkling are lamps and black specks of human creatures promanœuvring without suspicion of a human eye observing far above.

## SCALP SORES

## Eczema, Ulcers and Skin Diseases.

Don't you believe in nature? Don't you think that skin and blood diseases such as the above, can best be cured by applying nature's own herbal extracts? From Bible times the "herbs of the field" have been commended to mankind for this purpose. Zam-Buk is a combination of the finest medicinal herbal essences, concentrated, purified, and rendered highly antiseptic. Zam-Buk eases pain, stops suppuration, and heals all sores and skin diseases. A natural herbal balm, operating in nature's own way. Note well following cases.

### PROOF OF ZAM-BUK'S POWER.

Mr. Montague Jones, of Tavistock, Ont., says:—"About four years ago sores started to break out on my skin. I used salves to check them, but to no effect. I then turned them with iodine, and that took them away for a time, but only for a time, and they came on great pain. Sores then started to break out on my head. I went to the doctor, who told me that it was scalp eczema and that I should need to give it very careful attention. He gave me some salve which I rubbed on, but notwithstanding all my care I continued to get worse. I then tried several advertised remedies, but to the same end. One day I read a report about Zam-Buk, and I thought that what I had done for other people it could do for me, so sent for a sample box. The result of the use of so small a quantity was so satisfactory that I at once obtained a full supply. I also obtained a few boxes of Lillians for internal use. Within a very short time there was a marked improvement. I applied Zam-Buk in accordance with the directions and very soon the sores were all gone and the skin completely healed. They show no trace of returning, and I feel that I am cured to stay cured."

"Mrs. L. Finch, of Cambridge, Ont., says:—"Our little girl, May, had eczema on the scalp. It spread all over the head and the pain was so bad at times that the poor child screamed aloud. Her hair came out in patches. Hospital treatment failed. The first application of Zam-Buk eased the agony and by the time we had used a few boxes the disease was cured. It is the finest balm ever brought into a house for all skin injuries and diseases."

USE ZAM-BUK IF YOU SUFFER FROM:—Eczema or any skin disease. Ulcers. Abscesses, running sores, blisters, eruptions, chronic sores, etc. It also cures chilblains, chapped hands, cold sores, cuts, burns and bruises. It cures the pain of eczema and cures the skin itching, the hard veins and the redness of the skin. Also cures an embolism. Used by Sherrington, the Marathons winner; Lawson, ex-champion wrestler, and leading athletes the world over. All Druggists, 30 cents a box, or from the ZAM-BUK CO., TORONTO, upon receipt of price, 6 boxes for \$2.50.

# ZAM-BUK.

## Western News

Calgary has formed a 50,000 league called the "Calgary boosters."

The inhabitants of the new village of Bawli celebrated the election of the village overseer with a brass band procession.

The by-law to authorize the granting of \$25,000 to the C. N. R. by the citizens of Prince Albert has been carried by a vote of 161 to 2. The money is to be spent for a station site.

Sixteen head of bores averaging 1573 pounds and valued at \$3,000, were sold in Lacombe last week to the Bowman-Sine Lumber Co., of Revelstoke, B. C.

The citizens of Lacombe have organized a band of twenty pieces. The officers are L. B. Browne, president; J. K. Hilsley, sergeant; J. C. Mason, leader; H. Gottschlich, asst. leader; L. Beatty, sec.-treas.

James Cowan, of Winnipeg, has just closed the largest tie contract ever awarded to one man in this country. This contract calls for the delivery of 1,000,000 ties, 6,000,000 feet of logs and 300,000 feet of piling to be delivered on the C. N. R. before the spring. Mr. Cowan will take out ties and timber in the country around Mistatim, in Saskatchewan, just beyond the northwestern corner of Manitoba. He is now organizing his outfits and will be at work as soon as hard winter sets in.

Camrose Mail—The Mail Publishing Co. wish to recognize the promptness and courtesy of the C. P. R. in settling their claim for lost freight which occurred when installing their plant here last summer. The entire claim has been paid, thus showing, what we always strongly believed, that when the chief officials of the company are ap etaii abridi cm cm C. P. R. are approached, they will see that mistakes are corrected and the public protected.

W. H. Footner will be the new editor of the Calgary paper known as Town Topics, a literary paper. Before coming to Alberta he was connected with some of the best New York papers, and with one of the largest publishing houses in America. While here he has been associated principally with the Albertan. Early in August he went north to investigate the Peace River country, spending ten weeks in that unknown country. He will begin an interesting series of letters upon his travels in a few days for the Albertan and some eastern papers.

Lacombe Globe—There was a big killing at the poultry fattening station on Saturday when 250 birds were prepared for market. They were all sold to a Calgary firm at 20 cents per pound. The gain in weight during the fattening process showed an average of one and a quarter pounds. Some idea of the extent to which this business will be developed may be gained from the fact that orders have been received by the department from Alberta alone for over 200 tons of crate fattened poultry.

Nanton News: Announcement is made that a company represented by O. A. Robertson, F. B. Lynch, and F. H. Kenaston will develop fifty-five square miles of 20 ft. coal beds in Southern Alberta north of Cowley and west of Claresholm. One of the many experts who have been examining this property for the new owners during the past twelve or eighteen months, reports that four square miles in one body has a continuous bed of coal in layers ranging from 3 to 28 feet in thickness of sufficient quantity to keep a mine going at the rate of 2,000 tons daily for 100 years without any appreciable impression upon the stock of coal.

Nor-West Farmer—The inspection returns of the present season show that a large number of cars of wheat are being graded rejected on account of smut. In most cases this is due to the presence in the grain of smut that was grown in the same field; but there are other cases in which this is not so. Mr. D. D. Campbell tells us that there have come to his notice some cases in which all the evidence seemed to indicate that grain that was lightly smutted when it reached Winnipeg had been quite untainted when delivered by the farmer to the elevator. This goes to confirm a suspicion that we have long held, namely, that elevators, in which smutted and unsmutted grain is all elevated through the same channel, may prove a source of infection to much clean wheat.

There is also very good reason for believing that in some cases elevators ship out in farmers' cars wheat that is quite different from that delivered to them by the shippers. And so far as we have heard the mistake (?) has always been to the farmer's disadvantage. We have heard of cases in which grain that contained a large amount of screenings when it reached Winnipeg was declared by reputable men to have come from perfectly clean fields. Thus, in a few cases, the elevator operator seems to be solving the problem of how to dispose of his surplus screenings.

The most important news item it has been the pleasure of The Frank Paper to give to the public for some months is the announcement it is authorized to make this week that A. C. Flumerfelt and H. N. Galer, president and vice-president of the International Coal and Coke company of Coleman, have secured the control of the Alberta Coal and Coke Co., which owns probably the finest domestic coal property in Alberta, and will immediately proceed to open up another mine. The announcement is of the utmost importance to the Pass, and as well to the whole of Alberta, British Columbia, and the state of Washington, as it will solve the domestic fuel problem, which within the year has become a serious matter. The Alberta Coal and Coke Company's property is located about a mile east of Lundbreck, and consists of 6,400 acres with seven miles on the strike of the seams. There are on the property what are said to be 18 seams of coal, all of workable width, but engineers generally consider that the eighteen seams constitute three folds or six folds of three seams. There has never been sufficient work done on the ground to determine the facts further than that there are actually eighteen seams that might be worked from a single shaft. The coal is undoubtedly the finest lignite or domestic coal ever discovered in Alberta, in fact, according to hundreds of analyses that have been made by probably as many different parties, the coal runs so high in carbon as to virtually give it rank as a semi-bituminous. It is exceedingly hard, is very low in ash and practical tests have proven it exceptionally fine for all domestic purposes, while for steaming it is not far if any behind the bituminous coal of The Pass.

Camrose Mail—Today—twenty years ago! These remarks make us tired. Suppose just because we can't do the same, but there are persons who simply glory in digging up the past. We can't do it. First, our paper is not 20 weeks old, secondly our town is not 20 months old.

Camrose Mail—How are you fixed up for protecting the horses and cattle from the cold fall rains and fierce winds that sometimes come down on the southland, making us feel as if the North pole had got dislocated, and swung round to our back lot? You are keeping these animals as prisoners, and if you mistreat them you are a miserable, low-down sinner without any excuse for your cussedness. Get busy and fix up for your slave-prisoners so that you can class up with the decent and Christian people.

Medicine Hat News—Owing to the prevalence of Russian thistle in Southern Alberta special steps are being taken by the Department of Agriculture to have it checked before the country gets overrun with it. For this purpose the weed inspectors south of Leavings and east to Medicine Hat have been instructed to make additional inspections of all the land in their districts. They have been instructed to deal stringently in this matter, as the weed is a very bad one. It is a plant which caused many South Dakota farmers to desert their farms, and Dakota men will inform you today that they had to put boots or gunny sacks on their horses' legs in order to protect them while cutting their crops. Cases have already occurred in Alberta where the binder has been stopped with a single weed. Its great danger lies in the immense quantity of seed it bears and in the fact that it is a tumbling weed, and is thus liable to scatter millions of loose seeds across the country. In view of the importance of this work the Department earnestly bespeaks the hearty co-operation of the farmers in order to have it destroyed at the outset. Wherever a weed is seen it ought to be pulled and burned.

THE VALUE OF A GOOD COW.  
Mr. H. B. Gurler, one of the leading authorities on dairying in the United States, in discussing the value of a 400 lb. cow, says:  
"I am going to make a statement and undertake to prove it correct. When a cow that produces 200 lbs. of butter per annum at a food cost of \$39 and a labor cost of \$12.50 is worth \$35, the cow that produces 400 pounds of butter annually is worth \$400, and the owner can make net \$16 more from her after paying interest on the \$400 than he can from the cows that produce 200 pounds of butter. There is no more labor connected with the 400 pound cow than there is with the 200 pound cow. The price at which butter has been credited, i. e., 20 cents per pound, is the net price from the creamery after the making has been paid for. In this herd the increased cost of feed for the 400 pound cows was more than offset by the increased amount of skim milk, so that we have the 200 pounds increase of butter as net profit over the 200 pound cow. Two hundred pounds of butter at 20 cents is \$40. We have \$400 invested in these cows, which at 6 per cent interest is \$24, which we will deduct from the \$40 and we have left \$16 to the credit of the 400 pound cow."

## Health Building Time

Is not "two weeks vacation" or "a long rest." It's every day—every meal. What you eat to-day means more red blood—more brain power—more energy—more strength—or it means loss. It all depends on what you eat—not how much, but how good.

### Orange Meat

Is spent on health and strength and power—ready to BUILD mind and body. ORANGE MEAT is the right FOOD for bright, brainy men and women of to-day. Are YOU building up or tearing down? Growers everywhere have Orange Meat in 15c and 25c packages. Every 15c package contains a coupon, good for valuable premiums. Write "Orange Meat, Kingston" for new premium list. 25c or "Jumbo" package contains 2 1/2 times the quantity of the 15c size.

## Monster Lake Freighters

A glance at the list of freighters built for the season of 1906 shows to a certain extent the rapid growth of the industries of the territory tributary to the great lakes. At the beginning of 1906, the ship builders of the great lakes had under order 39 vessels for this year's delivery, of which 34 were bulk freighters, two passenger freighters, two car ferries, and one passenger steamer. Many of these boats had been ordered early in the preceding summer, a thing unprecedented in the history of the great lakes, as new vessels are usually not contracted for until late in the fall, when the volume of the next year's commerce can be more accurately gauged. With the exception of two 6,500 ton freighters, the 34 bulk (ore) freighters ordered had carrying capacities ranging from 8,000 tons to 12,000 tons, and a total carrying capacity of 338,000 tons. These 34 boats are capable of moving in a season approximately 6,760,000 tons of ore. The average carrying capacity of the modern lake freighter has grown so fast that it is now almost double what it was as late as three years ago. During the preceding year, 1905, there had been put into the water on the great lakes 28 steamers. All of the steamers ordered for 1906 delivery are now in commission.

One of the new ships, the Harry Couby, a bulk freighter of 10,000 tons, was built at the Lorain yard of the American Shipbuilding Co. The William P. Snyder, of 10,000 tons, was built at the Ecorse yard, Detroit, of the Great Lakes Engineering Works. The other two vessels are each 12,000 ton boats, the largest on the lakes. The Henry H. Rogers is one of the four sister ships built by the American Shipbuilding Co. (United States Steel Corporation), the other three being the J. Pierpont Morgan, Norman B. Ream, and Peter A. B. Widener. They are 600 feet over all, 380 feet keel, 55 feet beam and 32 feet deep. With a load of 12,000 tons they draw 19 feet. When drawing 21 feet they have actually carried 14,000 tons. This loading can be obtained on the exclusively Lake Michigan run from Escanabo to South Chicago, carrying ore for the Chicago plants of the Steel Corporation. The other 12,000 ton bulk freighter, the Edward Y. Townsend, with the sister ship, the Daniel J. Morrell, was built by the American Shipbuilding Co. of Philadelphia and is by a margin of two feet in length at present the largest freight boat on the lakes, being 602 feet over all and 582 feet keel. The extra 2 feet, however, is taken up in the forepeak, and does not represent cargo space. In 1907 there are to be three 605 ft. steamers built.

The practice of ordering well in advance of delivery has been continued this year. In fact, in the spring of 1906 orders began to be placed for 1907 delivery. Today there are under order for 1907 delivery 36 vessels, of which 34 are bulk freighters, one passenger steamer and one car ferry. These probably do not represent the extent of next year's building, for additional contracts are pending, and expected in the near future. Of this 22 will be built by the American Shipbuilding Co., nine by the Great Lakes Engineering Works, three by the Toledo Shipbuilding Co., Toledo, and two by the Collingwood Shipbuilding Co., Collingwood, Ont. These 34 bulk freighters range from 5,500 to 12,000 gross tons capacity, one being 5,500 tons, three 6,500 tons, six 7,000 tons, two 8,000 tons, three 9,000 tons, ten 10,000 tons, one 11,000 tons, and seven 12,000 tons. The tendency toward ships is therefore very marked.

As in the 1906 list the steel companies are prominent. Four of these steamers are for the Pittsburgh Steamship Co., and three for the Western Transit Co., which is controlled by the Topeka Iron & Steel Co., further profit from the moment the ore leaves the ground. More than this, the Lackawanna Steel Co., which has built at Buffalo the largest individual steel plant in the world, intends to engage in the transportation business. It has already ordered eight steel steamers for 1907 delivery, and it is understood that eight more steamers will be ordered by this company for the 1908 delivery. As part payment for the eight ships ordered, the American Shipbuilding Co. is to take over the plant of the Ship Owners' Dry Dock Co., Chicago, which has been controlled by Moses Taylor, vice president of the Lackawanna Steel Company.

It may appear as though this was too great prodigality, but already the new boats put in commission the present year have proved inadequate to meet the rapid expansion of lake commerce. In no other way, perhaps, is the great prosperity of the country better reflected than by the recent growth of lake shipments. The cause of this increase in lake tonnage is the great demand for iron and steel. Nearly all of the workable deposits of iron ore are in the Lake Superior country. They are abundant and of excellent quality. They are mined so easily and transported so cheaply that none of the other known deposits of the country can compete with these ores in furnace cost. Of late years this ore commerce, for which most of these vessels are exclusively built, has grown by astounding leaps and bounds, the mere

## Alberta at Halifax Exhibition

Mr. Frank Webb who was in charge of the Alberta exhibit at the Halifax Exhibition says that the exhibit created a profound impression among the easterners and demonstrated to them the resources and possibilities of our province in a manner that will undoubtedly induce a large emigration here next season.

The Alberta exhibit was the cynosure of all eyes and Mr. Webb thinks that this is the most probable method of advertising our district in the east. Not only did thousands from the Maritime Provinces view the exhibit but hundreds of visitors from the eastern states. Numerous inquiries were made as to the healthfulness of the district, the climatic conditions and particularly as to the opportunities afforded for stock raising. One was impressed with the intelligent questions asked and the sincere desire for information evinced by all classes. Mr. Webb had a plentiful supply of maps and literature which were eagerly sought.

Mr. Webb says hundreds of farmers took the names and addresses of the farmers who furnished the exhibit with a view to opening correspondence with them.

The press gave the widest publicity to the western exhibits and heartily commend the enterprise of the Saskatchewan and Alberta governments for furnishing such an addition to the Dominion exhibition. The Herald said "it was the best agricultural exhibit ever seen in Canada."

The grains and grasses are still on exhibition in Halifax. It was distributed among the various churches and a portion presented to the educational department of Nova Scotia with the labels still attached.

The visitors were amazed to the limit of incredulity at the length of straw of the oats, and Mr. Webb said it was ludicrous to see an old farmer carefully select one of the six-foot stalks to go if it was spilled. One part of the exhibit that aroused great interest and curiosity was the coal samples. The question of abundant cheap fuel appealed very strongly.

Mr. Webb had little time to examine the other exhibits of the fair. He says, however, the short-horn and dairy and dairy cattle exhibits were fine, especially the latter. The poultry exhibit was a splendid one, as was also fruit. He had no time to visit the race track and is unable to compare saddle and harness horses with those of the west.

Halifax is a beautiful city says Mr. Webb and is distinguished by the large number of beautiful lawns and gardens. The people of the city, the city authorities, and the managers of the exhibition treated the commissioners from the west with the utmost courtesy and hospitality.

increase of the movement of 1905 over 1906 being greater than the total movement of any one year up to 1898. This ore commerce is the largest single item in the tonnage of the railroads leading from Lake Erie ports. The ships are unloaded directly into cars, and it is a wonderful sight at the harbors to see the trains slowly moving under the unloading in a short space of time, and steaming away to the furnaces of the Ohio and Pennsylvania valleys.

The following figures show the growth of the ore trade of the great lakes since the canal at Sault Ste. Marie was first opened in 1855:

| Year. | Total Shipments |
|-------|-----------------|
| 1855  | 1,449           |
| 1856  | 36,343          |
| 1857  | 25,646          |
| 1858  | 15,876          |
| 1859  | 68,832          |
| 1860  | 114,401         |
| 1861  | 49,909          |
| 1862  | 124,169         |
| 1863  | 283,065         |
| 1864  | 243,127         |
| 1865  | 236,208         |
| 1866  | 275,736         |
| 1867  | 473,567         |
| 1868  | 830,540         |
| 1869  | 491,449         |
| 1870  | 617,444         |
| 1871  | 779,607         |
